Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement.

The vertical brush of US-A-5540186 is not provided with a flexible element and hence no swivelling is foreseen. Modification of the closest prior art (JP-A-11243802 or US-A-5540186) and to arrive at the claimed brushing device is not suggested by any of the documents cited and can not be seen as the result of a normal finishing operation because the prior art documents, either taken individually or in combination do not disclose, suggest or reasonably lead the person skilled in the art to consider the provision of a brush having a substantially vertical orientation with a flexible element permitting a swivelling of the brush to a substantially horizontal orientation. The person skilled in the art would not be able to combine all the features of claim 1 and as such arrive at the claimed brushing device without an inventive activity.

Moreover, claims 2 to 9 are dependent on claim 1, and thus all the claims satisfy the requirements of Article 33(2)(3) PCT.
